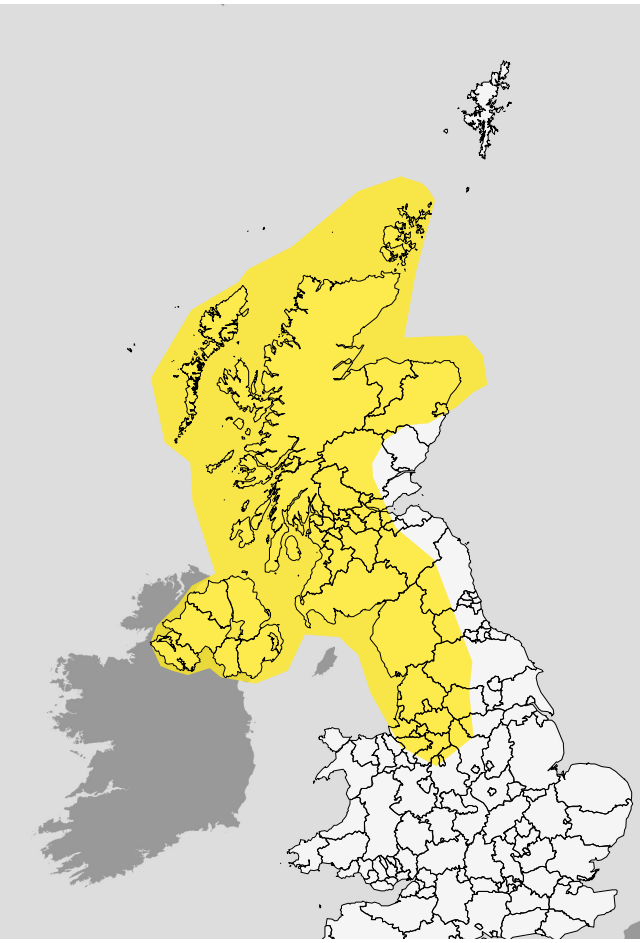
Yellow warning
Ice

Between
18:00 Fri 18 Feb 2022 and
09:00 Sat 19 Feb 2022



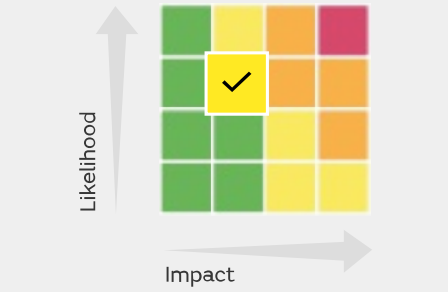
A mixture of wintry showers and clear spells are likely to lead to a cold night with some icy stretches developing on untreated surfaces.

What to expect

- Probably some icy patches on some untreated roads, pavements and cycle paths
- Some injuries from slips and falls on icy surfaces

Further details

Brisk northwesterly winds will continue to bring increasingly wintry showers across this area overnight on Friday and at first on Saturday. Some snow is likely to accumulate over around 200 m (another 10-15 cm over Scottish Mountains), but the wintry mix is more likely to bring a risk of icy roads and pavements, as surfaces left wet by showers (or hail/snow/slush) then fall below freezing. Most showers will ease by Saturday morning.



Medium likelihood of low impacts

Issued at 10:32 Fri 18 Feb, 2022
